

### **LADIES AND GENTLEMEN**

On behalf of Istanbul-based Turmar Marine, we would like to extend our most sincere congratulations to this year's International Black Sea Transport forum and wish every success to this very important and timely initiative.

Turmar Marine has been a leading service company in the maritime business for over 30 years, operating at the cutting edge of maritime technology and innovation. We are honored and excited to be a sponsor of this year's event which will address maritime developments in key sectors from logistics to technology application.

We believe that the seas will continue to play a seminal role in connecting continents and peoples across our planet, improving the economies and wellbeing of states and individuals alike. Maritime business cooperation will be an integral part of this evolution and Turmar Marine intends to play its role, including by supporting initiatives which highlight the potential of bilateral maritime cooperation.

Turkey and Ukraine enjoy good neighborly relations and have a common interest and stake in investing in maritime cooperation in the Black Sea and beyond. We believe that maritime business companies can be instrumental in supporting this cooperation, creating together the sea-highways of the future.

We look forward the outcomes of this year's forum and would like to wish all the participants and guests a most pleasant and interesting attendance.

Best regards,

Director of Sales and Marketing

Mehmet Burc Canga
